Consumable Science Scores by Hiring Tim Davenport as CEO

Washington, DC, [April 8, 2015] – [Consumable Science](#)[™], a science & technology platform that connects world class science to consumer health, announced Tim Davenport has joined the company as Chief Executive Officer.

"Tim has been providing guidance for several years and I couldn't be happier that he is joining our world class team of medical researchers, technologists and healthcare industry professionals to lead us on our disruptive path in healthcare," commented Teresa O'Keefe, co-founder of Consumable Science. "He is committed to our vision of changing the game in healthcare by empowering and motivating consumers to manage their own health."

Davenport has been involved in innovative and disruptive health companies for the past decade. He served as President of Revolution Health where he led the development of a broad range of innovative offerings of health content, tools and wellness solutions. Recently, Davenport was the CEO of Sermo, a disruptive startup that grew to be the #1 social network for doctors in the U.S. Previously, Davenport was CEO of several technology companies including Best Software where he lead their successful IPO.

"Consumable Science has been conceived and built on a thoughtful and knowledgeable foundation. I'm excited to lead the organization through a transformative era in consumer health innovation," commented Davenport.

"There is huge potential for a scientific health score. I have firsthand experience having monitored my own health and tracking changes in MyBodyScore. I know this has the potential to make people healthier and to help organizations better understand the health of their employees, patients and members."

About Consumable Science

Consumable Science[™] (CS) has created the first of its kind universal health score for consumers. Its flagship product, MyBodyScore[™], brings simplicity to healthcare by enabling consumers to understand and track their health risk over their lifetime with a health score, similar to a credit score, developed with world class clinical researchers. CS Sponsors such as employers, health and life insurance companies, exchanges, etc., can leverage CS' technology platform and patent-pending *Health Score Bureau*[™] to incentivize consumers to adopt healthy behaviors. CS also enables organizations to benchmark their populations with peer groups and measure the efficacy of health management programs. The public can visit [consumablescience.com](#) and [mybodyscore.com](#) for more information.
